

Web Programming Lab (PCS 693)

Assignment-1

Topic: Complete HTML

Note: Use only **HTML tags** to complete this assignment.

Question 1: Create an HTML webpage to display your **personal profile** containing:

- Name
- Photograph
- Qualification
- Skills
- Hobbies

Use appropriate **heading, paragraph, image, and list tags**.

Question 2: Design an HTML page for a **college department** that includes:

- Department name as a heading
- Vision and Mission as paragraphs
- A table showing **faculty name, designation, and email ID**
- Use proper formatting tags.

Question 3: Create an HTML **registration form** for a training program that includes:

- Text fields for name and email
- Radio buttons for gender
- Checkboxes for courses
- A submit and reset button

Use appropriate form elements.

Question 4: Design an HTML webpage using **frames or iframe** to display:

- One section showing a navigation menu
- One section showing the main content
- Clicking on menu items should change the main content.

Question 5: Create a webpage using **HTML5 semantic tags** (header, nav, section, article, footer) to design a simple **college website homepage**.
