

## ***Web Programming Lab***

### ***Assignment – 4***

**Question 1:** Create an HTML page to explain input and output using a calculator with the use of various predefined functions and objects in Javascript.

**Question 2:** Create an html page to explain the use of various predefined functions in window objects in java script.

**Question 3:** AIM: To create an html page to change the background color for every click of a button using javascript.

Problem Statement:

1. Create a html page named as `changebackground_color.html`
2. Define a method named as `random_color()` which is to be called when you click on the body. This method should generate a random number, which is used to set the background color.

**Question 4:** AIM: To create an html page with 2 combo box populated with month & year, to display the calendar for the selected month & year from the combo box using javascript.

Problem Statement:

Create a html file named as “`Claendar_month.html`”

1. Add two combo box one to display month & another for year and one button.
2. When the button is clicked display the calendar for the selected values.
